

Certificate of Analysis SALSA[®] MLPA[®] Probemix P058 IGHMBP2

P058-025R, P058-050R, P058-100R	
Probemix P058 IGHMBP2	
A4-1123	
25, 50, or 100 reactions.	
Dry ice or cooling elements.	
Store upon arrival between -25°C and -15°C.	
Expiration date: November 2028, when stored at recommended product should not be frozen/thawed more than 25 times.	conditions. This
This product has been developed to determine the DNA copy number of the human <i>IGHMBP2</i> gene, as described in table 1 and 2 of the product description. This probemix is designed for use only in combination with SALSA MLPA reagent kits and Coffalyser.Net analysis software as described in the MLPA General Protocol.	
 Sufficient distance between peaks, absence of extra or shoulder peaks, and completeness of hybridisation of each individual probe, as tested on Applied Biosystems and Beckman/SCIEX GeXP sequencers. Standard deviation of each individual probe ≤0.10, when tested on 22 different DNA complex of healthy individual extracted by 	Test result
 various methods. Each individual probe meets reaction-specific criteria when tested on a single DNA sample under various experimental conditions. No-DNA controls result in only five major peaks shorter than 121 nucleotides (nt): four Q-fragments at 64, 70, 76 and 82 nt, and one peak in the range of 0-40 nt corresponding to the unused portion of the fluorescent PCR primer. Non-specific peaks longer than 121 nt AND with a height <25% of the median of the four Q-fragments 	PASS
	Probemix P058 IGHMBP2 A4-1123 25, 50, or 100 reactions. Dry ice or cooling elements. Store upon arrival between -25°C and -15°C. Expiration date: November 2028, when stored at recommended product should not be frozen/thawed more than 25 times. This product has been developed to determine the DNA copy numb <i>IGHMBP2</i> gene, as described in table 1 and 2 of the product descripting This probemix is designed for use only in combination with SALSA M and Coffalyser.Net analysis software as described in the MLPA Genere Sufficient distance between peaks, absence of extra or shoulder peaks, and completeness of hybridisation of each individual probe, as tested on Applied Biosystems and Beckman/SCIEX GeXP sequencers. Standard deviation of each individual probe ≤0.10, when tested on 23 different DNA samples of healthy individuals, extracted by various methods. Each individual probe meets reaction-specific criteria when tested on a single DNA sample under various experimental conditions. No-DNA controls result in only five major peaks shorter than 121 nucleotides (nt): four Q-fragments at 64, 70, 76 and 82 nt, and one peak in the range of 0-40 nt corresponding to the unused portion of the fluorescent PCR primer. Non-specific peaks longer than 121

None of the ingredients are derived from humans, animals, or pathogenic bacteria. Based on the concentrations present, none of the ingredients are hazardous as defined by the Hazard Communication Standard. **A Safety Data Sheet (SDS) is not required for these products**: none of the preparations contain dangerous substances (as per Regulation (EC) No 1272/2008 [EU-GHS/CLP] and amendments) at concentrations requiring distribution of an SDS (as per Regulation (EC) No 1272/2008 [EU-GHS/CLP] and 1907/2006 [REACH] and amendments). If spills occur, clean with water and follow appropriate site procedures.

Certificate of Analysis SALSA MLPA Probemix P058-A4 IGHMBP2 sample picture

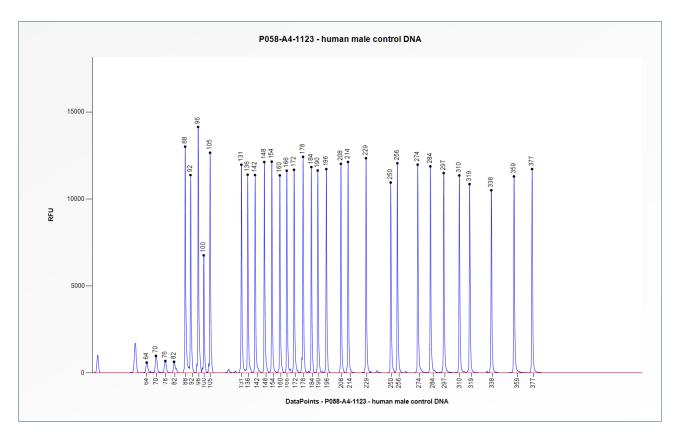

Figure 1. Capillary electrophoresis pattern from a sample of approximately 50 ng human male control DNA analysed with SALSA MLPA Probemix P058 IGHMBP2 (A4-1123).

This lot was certified by MRC Holland on 22 February 2024.

This certificate is a declaration of analysis at the time of the manufacturing process. All assays were run in compliance with manufacturer's instructions for use.

Implemented changes in the COA Version 01 – 22 February 2024 (6)

- Not applicable, new document.
